Lisa, as I remember it, reviewed the engineering report that was only couple of years ago, and I do not recall if I received anything in writing from her. I remember we discussed it few times on the phone. I believe she gave the report to Ben Cope of EPA and he had few questions from Anis Ahmed concerning mixing zones that he dealt with him directly. All those were about of couple of years ago during the engg report review. We received absolutely no comments from anyone when the permit was issued in 2007. I am quite sure about it. Thanks.

Thanks Ed. I was told by my manager that Lisa Olson had reviewed the previous draft and provided comments. Maybe that was the version before the current permit. How time flies...

Karen;

When we issued the current permit we received no comments. I do not have anything for you now. Please let me know if there is anything else you need. I look forward to be working with you concerning the proposed permit. Thanks.

Ed,

The EPA may review the above-referenced permit consistent with the Performance Partnership Agreement (PPA) and the EPA's obligation to oversee implementation of the National Pollutant Discharge Elimination System (NPDES) program by delegated states. It appears that the PARIS database does include the Response to Comments for the current permit. Would you be able to sent me a copy? Thank you. Best regards, Karen.
